

**PTTEP Australasia TIMOR SEA OPERATIONS
Incident Information #93**

Date: 9 November 2009 1350 WST

PTTEP Australasia reports planning continues through safety assessments to be presented to the National Offshore Petroleum Safety Authority (NOPSA) this week, prior to reboarding the Montara well head platform.

The PTTEP drilling team and ALERT Well Control specialists continue to look at all options to assess the fire damage and determine the best and safest way to plug the H1 well.

The Montara well head platform and H1 well remain stable following the successful well kill operation last week.
