

PTTEP Australasia TIMOR SEA OPERATIONS
Incident Information # 86

Date: 2 November 2009

ATTENTION PHOTO EDITORS

Please see attached picture and related caption below for attached image taken this afternoon Monday 2 November 2009.

CAPTION:

The Montara well head platform (left) on fire - as taken from the fire fighting vessel *Nor Captain* this afternoon during a run to within 200 metres from the burning structures to allow ALERT Well Control experts onboard to better assess the situation status.

The cantilever structure - which previously sat over the well head platform - can be seen buckled over and down on to the helideck of the well head platform.

Flames from the burning well head are being blown on to the upper superstructure of the West Atlas rig (right).
